

MUNICIPAL CODE OF THE VILLAGE OF LAKE NEBAGAMON

Preface

Democracy is a government of laws. Good democracy requires not only good laws, but laws which are readily available in written form to all who are subject to the public officials and police officers who must administer them and to the judges and attorneys who must interpret and apply them. It is for this reason that the Village Board of Lake Nebagamon has adopted this code of general ordinances. This code represents the contribution of the Village Board to the democratic and efficient administration of the government and affairs of the Village of Lake Nebagamon, June 2016.

Under Wis. Under Wis. Stat. § 26.12 part one, the Conservation Commission of Wisconsin may by rule establish an intensive Forest Protection District in areas where they feel there is a need of protection from forest fires. Wisconsin Administrative Code 30.01, part one, established Forest Protection District #1 as an intensive district including all lands in Bayfield and Douglas Counties outside of the limits of incorporated cities and villages.

The incorporated Village of Lake Nebagamon, Douglas County Wisconsin, located within Forest Protection District #1, but not part of it, is approximately 26 miles square in size, has many areas of dense field, marsh, and forest cover, and could by its location and nature complicate the problem of fire detection by District #1 Unless the same system of fire detection is carried on in the Village as with District #1.

The Village of Lake Nebagamon has established for protection from fire a unique fire department both in personnel and equipment and has passed a mutual aid agreement with the Department of Natural Resources, which is as follows:

Setting of Fires Regulated The Village Board of the Village of Lake Nebagamon do ordain as follows: No person shall set any fire except for warming the person or cooking food within the limits of the Village of Lake Nebagamon at any time of the year except when the ground is snow covered unless written permission has been received beforehand from a duly appointed fire warden.

Penalty The penalty for violation of any provision of this section shall be a penalty as provided in § 15.04 of this code.

- H. Fire Warden The Wisconsin Conservation Department shall appoint an emergency fire warden or designate an individual as a permit-issuing agent within the limits of the Village of Lake Nebagamon. It will also provide this person with the necessary forms so that he or she may issue burning permits under the Village ordinance governing the setting of fires with the Village limits of Lake Nebagamon and under state law to people wishing to burn material in the surrounding area of the Village of Lake Nebagamon. The restrictions governing the issuing of these permits shall be given by the district ranger of District #1.

Burning permits will be issued by the Village Office in accordance with Department of Natural Resources Guidelines.

Whenever smoke is located within the limits of the Village of Lake Nebagamon which appears to be from a wild running fire or is not accounted for, the district dispatch office

will so inform the fire chief of Lake Nebagamon or his assistant and also cause an investigation to be made of the smoke as he would if such condition existed within the district. The person or persons directed by the State to investigate the smoke will take the same normal action as we would on a smoke within the district, but when in contact with the fire chief or his/her assistants they will work or be released under the fire chief's direction. In case the smoke was a result of illegal burning, he/she will turn all information concerning the matter over to the fire chief.

The Lake Nebagamon Fire Department may request assistance on all fires within the Village limits and the Wisconsin Conservation Department will render all assistance possible in the Village within the limits of its resources and facilities without charge to the Village. All requests for assistance should be directed to the district forest ranger or his/her assistants at Brule, Wisconsin.

The conservation department will generally be concerned with the suppression of forest fire, and marsh fires, or any wild fire clearly defined under Wis. Stat. § 26.11.

Within District #1 but within an area reasonably closed to the Village of Lake Nebagamon, a forest ranger or an emergency fire warden may request assistance from fire department to suppress forest fires, which are threatening buildings, or when sufficient other manpower is not available.

The fire department agrees to contribute its fire suppression services to the Wisconsin Conservation Department without requesting pay.

The fire department agrees to make every effort possible to immediately notify the Conservation Department when they have knowledge that a forest fire, or a fire which may become a forest fire, is burning within the limits of District #1.

This notice to be made at the earliest practical moment in the best available manner to the area Ranger or Forest Ranger at Brule, Wisconsin.

§21.01 INTRODUCTION: AUTHORITY, PURPOSE AND INTERPRETATION

In accordance with the authority granted by Wis. Stat. § 236.45, and for the purposes listed in Wis. Stat. §235.01 and 236.45 (2103-2014), the Village Board ordains:

The provisions of this Ordinance shall be held to be minimum requirements adopted to promote the health, safety, morals, comfort, prosperity and general welfare of the Village.

This Ordinance shall not repeal, impair or modify private covenants or public ordinances, except that it shall apply whenever it imposes stricter controls on land use.

§21.02 GENERAL PROVISIONS

- A. A subdivision includes any division of a parcel of land by the owner or his agent for the purpose of sale or building development where:
 - 1. The act of division creates two or more parcels of less than five acres each.
 - 2. Two or more parcels of five acres or less are created by successive divisions within a five year period.
- B. No division of land within the Village or within its extraterritorial jurisdiction shall be permitted if it results in a subdivision, unless a plat of the subdivision is submitted and approved in accordance with this Ordinance and Wis. Stat. Ch. 236.
- C. In addition to the provisions of this ordinance and Wis. Stat. Ch. 236, all subdivisions shall conform to the zoning ordinance, the official map ordinance and the General Development Plan, for the Village of Lake Nebagamon and its extraterritorial planning area.

Stat. § 236.45, 235.01, 236.145 and 62.23 (7)(e) 10 to 15, within 30 days of notification of the rejection of the plat. Where failure to approve is based on an unsatisfied objection, the agency making the objection shall be made a party to the action. The court may direct that the plat be approved if it finds that the action the approving or objecting agency is arbitrary, unreasonable or discriminatory.

Preliminary Meeting Before filing a preliminary plat the subdivider shall consult with the Planning and Zoning Commission and/or its staff for advice regarding general requirements affect the proposed development. A sketch of the proposed subdivision drawn on a topographic survey map should be submitted. The subdivider shall also submit a location map showing the relationship of the proposed subdivision to traffic arteries and existing community facilities.
- B. Preliminary Plat. The subdivider must submit to the Planning Commission and to those agencies having the authority to object to plats under provisions in Chapter 236 of the Wis. Stat. § §, a preliminary plat based upon an accurate exterior boundary survey by a registered land surveyor which shall show clearly the proposed subdivision at a scale of not more than one inch per 100 feet having two-foot contour intervals, shall identify the improvements (grading, tree planning, paving, installation of facilities, and dedications of land) and any prior easements which the subdivider proposes to make and shall indicate

by accompanying letter when the improvements will be provided. Any proposed restrictive covenants for the land involved shall be submitted.

After review of the preliminary plat and negotiations with the sub-divider on changes being advisable and the kind and extent of public improvements which will be required, the Planning and Zoning Commission shall reject or approve conditionally the preliminary plat within 40 days as provided by statute.

Approval of the preliminary plat shall entitle the sub-divider to final approval of the layout shown by such plat, provided the final plat conforms substantially to such layout and other conditions of approval have been met.

- C. Final Plat Final plats shall be submitted to the Planning and Zoning Commission within six months of preliminary plat acceptance unless this requirement is waived in writing by the Planning and Zoning Commission. The final plat shall conform to the preliminary plat as approved and the requirements of all applicable ordinances and state laws and shall be submitted for certification of those agencies having the authority to object to the plat as provided by Wis. Stat. § 236. The final plat shall be accompanied by detailed construction plans of all improvements. The final plat shall be presented to the Planning and Zoning Commission at least ten work days prior to the meeting at which it is to be considered and shall be accepted or rejected by the Planning and Zoning Commission and the Village Board within 60 days of its submission, unless the time is extended by an agreement with the sub-divider. Reasons for rejection shall be stated in the minutes of the Village Board meeting and a copy thereof or a written statement of such reasons shall be given to the sub-divider. Approved final plats shall be recorded in accordance with the statutory requirements prior to the time that lots are offered for sale, reference is made to the map for sale purposes, or use is made of lot and block numbers shown on the plat.

If the original of the final plat has been filed with another approving authority, the subdivider may file a true copy of such plat in lieu of the original. However, before approval of the Planning and Zoning Commission and the Village Board will be inscribed on the original of the final plat, the surveyor or sub-divider shall certify the respects in which the original of the final plat differs from the true copy, and all modifications must first be approved. All approval must be in writing and a copy attached to the final plat.

§21.05 DESIGN STANDARDS

A. Streets and Lots

1. The subdivider shall dedicate land and improve streets as provided herein. Streets shall conform to the official map ordinance of streets. Streets shall be located

6. The number of intersections of minor streets with major streets shall be reduced to the practical minimum consistent with circulation needs and safety requirements.
7. Where a subdivision abuts or contains an existing or proposed arterial highway. 8. Reserve strips controlling access to streets shall be prohibited.
9. A tangent at least 100 feet long shall be required between reverse curves on arterial and collector streets.

3. In the event the procedure under paragraph (2) is followed, the construction of all improvements required by these rules and regulations must be completed within two years from the date of approval of the final plat by the Village Board unless good cause can be shown for the granting of an extension of time by authority of the Village Board. If no extension is granted, the Village at its option, may cause all uncompleted required work to be constructed, and the parties executing the bond shall be firmly bound for the payment of all necessary costs thereof.
4. The approval of the final plat by the Village Board shall constitute acceptance of the dedication of any public street, road, or highway dedicated in such plat.

5. Where unusual or exceptional factors or conditions exist, the Village Board may modify the provisions of this ordinance. A written statement of the reasons for such modification shall be attached to all copies of the construction plans.

B. Improvements

 - a. Streets rough-graded from property line to property line, and terraces top-soiled to conform to specification established by the Village Board and on file in the Village Clerk's office.
 - b. A public sanitary sewer system adequate to provide the subdivision with a complete sanitary sewer system, including a lateral connection for each lot, and connected in a satisfactory manner to the village sanitary sewer system.
 - c. A complete water distribution system adequate to serve the area platted including connections for each lot. The entire system shall be designed to meet the approval of the Village Board. The Village shall pay for and install all necessary fire hydrants, providing that the developer appropriately advises the Village from time to time when the system is ready for the installation of said hydrants.

CHAPTER 23

COMPREHENSIVE OUTDOOR RECREATION PLAN

(AMENDED 1988, 1996, 2014, 2020)

§23.01 RECREATION NEEDS AND RECOMMENDATIONS

§23.02 GENERAL RECOMMENDATIONS

§23.03 SUMMARY AND CONCLUSIONS

§23.04 ADOPTION OF THE LAKE NEBAGAMON OUTDOOR RECREATION PLAN

§23.01 RECREATION NEEDS AND RECOMMENDATIONS

The village has approximately 23 acres of park and recreation areas, not including the land on which the hiking trail is located, owned by Douglas County. This total is almost eight acres more than the Village had in 1988 and include the more than seven acres added to Finell Park two years ago.

Using the standard discussed previously, 12 acres of developed parks and open space per 1,000 persons, the existing 23 acres should be sufficient for the needs of the residents of the Village. Any land added in future would be sufficient for the needs of the residents of the Village. Any land added in the future would be to enhance existing facilities or for specialized uses, such as the addition to Finell Park for another ball field and nature area.

As shown in Table 2, the existing recreation land devoted to Community Parks is in excess of the ideal set earlier in this report. When the nature of the Village is considered, however, this is not extraordinary. A rural, lake oriented community has less need for neighborhood parks because of the recreational aspect of most residential sites located on or near the lake. There is a great need for community wide parks where activities are centered on larger groups of participants and spectators. It is also in the best interest of the community as a whole to have recreation areas which draw visitors and their money to the Village.

Existing Facilities and Recommendations –

A. Finell Park

This park is the largest in the Village and is the site of the Village's two regulation sized ball fields, used by adult, youth and school leagues. It also has a playground and two tennis courts. It is the main site of the athletic events for the entire village and much of the region with a lighted pavilion, dugouts and bleachers. Repairs and improvements have been made to the structures and the parking lot. The remainder will be left as a wildlife – nature walk area. The bathroom facilities have been upgraded with newer toilets. The tennis court has dual use as it has been striped for pickle ball.

The recommendations which follow are not specifically prioritized, however, in most cases, the first recommendation listed is the most needed.

1. The playground needs to be expanded.
2. An access road needs to be installed to the new field.
3. Landscaping is needed for the entire area, including seeding and fertilizing the new
4. An additional source of water would be desirable at the east end of the park.
5. A BBQ pit would be an asset at the pavilion, as would a water supply for cooking.
6. Additional signage is needed to commemorate the donation of the new land by the field.

B. Ravine Park (formerly Village Park)

The second largest village park is located off the corner of Ravine Park Drive and Camp Nebagamon Drive and is bisected by County Road B. The heavily wooded area on the south side of the highway is equipped with picnic tables and BBQ grills, and playground equipment has been added. The bathrooms have flush toilets and plumbed sinks.

The ice skating rink east of the campground has a small warming house. The rink is lighted for night use as well as daytime skating.

Basketball, volleyball courts, and a pavilion were added to the park area on the north side of the highway and are used heavily by older children.

Recommendations:

1. Signage is needed to direct visitors to the park and rink.
2. The base of the skating rink needs to be replaced with concrete to hold water and prevent seepage which has plagued the site regularly.

C. Jefferson Memorial Park (Auditorium, Public Beach & Boat Dock)

The auditorium is a unique log structure built in 1936 by Works Progress Administration Labor and is reminiscent of the Village's logging camp origin. It is listed in the National Register of Historic Places and is one of the only two remaining representatives of the Village's culture and history. It is the cornerstone of the Village's central business district and is also the site of the municipal and police offices, and most of the indoor social, recreational and entertainment programs. It includes a large auditorium/ballroom, a proscenium stage, storage rooms and a kitchen.

The swimming beach is used heavily during the summer by both residents and visitors. It includes a picnic area and pavilion, new playground equipment, including handicapped accessible units, and a memorial flag and flower area. The park is named for Thomas Jefferson.

In 2012 a rain garden was developed. Air conditioning was installed into the auditorium in 2013.

Recommendations:

1. The pavilion should be lighted and a BBQ grill and a source of water should be provided there.

D. Coolidge Memorial Park

The only amenity in this park presently is a sign displaying the Coolidge name.

Recommendations: none

E. Hwy B Mini Park

This attractive area was created by volunteers and is highlighted by an original mural created by renowned artist Tony Yaworski, a resident of the Village. It has a “welcome” sign and makes an excellent impression on visitors and motorists traveling on the main highway through the Village. A log planter with decorative shrubs and flowering plants is surrounded by benches and encourages pedestrians to stop and rest.

Recommendations: The mural here is a valuable and irreplaceable asset for the Village and it needs to be protected with a plexiglass cover to preserve it for the future.

F. Fitch Avenue Mini Park

This new park provides an excellent lake viewing area for residents of the nearby senior citizens’ apartments and is maintained for the most part by neighboring property owners who mow the grass regularly.

Recommendations:

- 1) Because the area is primarily for the use of the senior citizens, they should be encouraged to add some plots of flowers and maintain the area. This would not only provide some color to the area, but would also give the seniors some physical activity which would be therapeutic.
- 2) Local service organizations should be encouraged to use the gazebo as a site for some entertainment which would be suitable for the senior citizens.

G. Boat Launch & Fishing Dock

The launch pad itself was recently improved and it is more accessible to a variety of watercraft. Parking is limited.

H. Cleary Park

One acre space planned for future walking trail.

§23.02 GENERAL RECOMMENDATIONS

The following is a list of general recommendations which the Village of Lake Nebagamon may also wish to implement. Some have already been mentioned in this report, but are elaborated upon here. Additional recommendations not previously presented are also listed.

- 1) Tri-county Recreational Trail A decisive and aggressive plan should be made immediately for connecting the Village to the nearby Tri-county Recreational Trail, which runs from Superior to Ashland, and to the newly planned Wild Rivers Trail, which will run from Superior to Spooner along a former railroad right of way. This is in high demand, but strong leadership is needed to make these a reality. Any winter recreational use depends on these trails being connected to the Village.
- 2) Maintenance The Village must work out a regular schedule for maintenance, cleaning, and garbage pick-up. Bathrooms should be cleaned at least every other day during the prime seasons and garbage cans should be emptied as needed, at least twice a week.
- 3) Signage The Village should complete a Village-wide signage plan to make sure all areas are designated and have directional signs from the main highways.
- 4) Recreational Development Map Undeveloped areas of the Village should be examined by the Parks & Recreation Committee and the Planning & Zoning Commission and an area map should be created pinpointing areas which would make good locations for future parks and recreation. This would facilitate:
- 5) Park Dedication Residential sub-dividers should be asked to dedicate a portion of their land for permanent parks and/or open space. Neighborhood parks should be acquired in this manner in newly developed areas. Local landowners should also be encouraged to dedicate land to the community for open space or recreational use.
- 6) Private Development Areas of the Village should be examined to determine sites which lend themselves to the development of privately owned recreation facilities, such as water parks and recreational vehicle campgrounds.
- 7) Service Group, Senior Citizen & Neighborhood Involvement Area service groups, senior citizens and neighbors should be encouraged to take a more active role in planning recreational activities and in park development and improvements. These should also include development of competitive sports activities and beautification projects. Continued activities of this type could help to meet the need for neighborhood facilities and supplement limited municipal funding resources providing volunteer planners and laborers.
- 8) Aid Programs Take advantage of state and federal financial and technical aid programs which are designed to assist communities in meeting recreational needs, and maintain community eligibility for such programs.
- 9) Community Beautification and Clean-Up All inhabitants and property owners in a community should recognize that community appearance is an important component of a recreation program. A rewarding program includes: well-maintained streets and sidewalks, attractive trees and shrubs, well cared for homes and commercial buildings, and neatly landscaped areas, public open space and parks are principal contributors to community beautification.
- 10) Winter Activities Since the area enjoys a long and beautiful winter, more emphasis should be placed on developing free or low-cost winter recreational activities. The existing skating rink should be maintained with more care and prepared for more effective use. At present, maintenance is often slip-shod and sporadic with little attention paid to use, which can be anticipated for weekends and the winter vacation times for school children.

- 11) Future Planning At a minimum, all communities should reassess their recreational needs near the end of the five year period covered by this plan. More frequent appraisals of needs may be called for under certain conditions such as extreme variations in funding capability, rapid population changes, actions of other units of government and private enterprise, and the recognition of new legislation, laws and public programs.
- 12) Community officials should develop five year capital improvements programs for recreation that reflect implementation of proposals made in their plans and the priorities they place on them. To be functional, the program must be flexible and be subjected to annual review. In developing a recreation program, care should be taken that the annual cost of maintenance does not exceed an amount the community can afford to pay. Too often, an ambitious program can lose community support as a result of prohibitive maintenance costs.
- 13) Community and school officials responsible for recreation should place greater emphasis on the provision of areas and facilities that can support “lifetime” recreational activities. Falling into these category are activities like golf, tennis, all target sports, horseshoes, cross-country skiing, skating, running, volleyball, handball, badminton, backpacking, and canoeing. Too often, community and school recreation facilities are oriented to games important only to the most athletically inclined rather than to recreational opportunities for less athletically inclined men and women. In designing recreation areas, recreational needs of all members of the community should be taken into account. Many schools have successfully instituted instructional programs aimed at teaching recreational activities people can participate in for a lifetime rather than just during their youth.
- 14) Historic Sites can be rewarding additions to any community recreation program. This is especially true in areas oriented to serving a significant tourist trade. A study of potential areas is encouraged. Assistance and guidance for their study can be obtained from the Wisconsin Council for Local History, an organization affiliated with the State Historical Society and the Douglas County Historical Society.
- 15) The need for community officials to establish priorities within their recreation program is emphasized by the scope of previous recommendations. Although it is likely that all of these recommendations will be undertaken within the time period of this plan, there is an outstanding opportunity for inroads to be made. Recognition of increasing demands for recreation, space and facilities should prompt immediate action.

§23.03 SUMMARY AND CONCLUSIONS

Recognizing that recreation is essential to the welfare and happiness of their citizens of a community, officials must be prepared to provide the leadership necessary to implement a decisive plan for that recreation which will benefit all facets of the community. It is not sufficient to simply adopt a plan without implementation. It is imperative that those in positions of leadership establish a priority plan of action and follow it.

Too often, recreation is considered less important than other community programs. In the case of Lake Nebagamon, a bedroom community to the twin ports metropolitan area of Duluth and Superior, recreation is one of the prime reasons its citizens have chosen to live here. Almost all of the residential property is located within three to four blocks of the lake and much of the recreation, summer and winter is related to the lake.

People desire and need recreational outlets, and it is the partial responsibility of community government to see that they are provided.

Lake Nebagamon has some excellent recreation facilities that would benefit greatly from implementation of some or all of the improvements recommended in this plan. Financing and priorities have also been discussed and facilitates that would be absolutely costless to the local taxpayer are probably going to be difficult to obtain. Adoption of this plan, however, will qualify the Village of Lake Nebagamon for a number of federal and state cost sharing programs available to communities.

By adopting the enclosed resolution, the Village Board is applying for certification of the plan by the Wisconsin Department of Natural Resources, Bureau of Planning and Bureau of Aid Programs, and pledges to take whatever steps necessary to implement to plan and provide residents, property owners and visitors with the best possible parks and recreation program.

THEREFORE, BE IT RESOLVED, that the Village of Lake Nebagamon Board of Trustees hereby formally adopts the Lake Nebagamon Outdoor Recreation Plan as the official policy statement for the development of outdoor recreation programs and facilities in Lake Nebagamon.

Adopted this 28th day of May, 1996.
