SITE PLAN AND LOCATION MAP

Incomplete Site Plans may result in delay or denial of your proposal.

Site Plans Shall Include:

- using the frontage road as a guideline (indicate the name of the road), fill in the lot dimensions
- show the approximate location and size of the new structure, if applicable (NS)
- show any existing structures on your property (ES)
- show the locations of the existing well (EW), new well (NW), septic tank(ST) and drain field (DF)
- show location of existing sewer Right of Way and Manholes (MH)
- show the location and name of any lake, river, stream or watercourse on or near property
- FOR NEW STRUCTURES - show the measurements, in feet, of the following on the diagram

Distance from proposed structure to:

- all lot lines
- centerline of road(s)
- lake, river or stream (measured horizontally from the high water mark)
- septic tank & drainfield
- well

The following measurements are also required

- distance between septic tank and well
- distance between septic tank and lake, river or stream
- distance between drain field and the well
- distance between structures and sewer right of way

PROPOSED NEW STRUCTURE LOCATION MUST BE STAKED AND INSPECTED FOR SETBACK COMPLIANCE BEFORE PERMIT IS ISSUED

If you have a survey, please attach it to the application

| | | | | |
|-----------------------|--------------------------------|--------------------|-----|----|
| For Office Use | Date of Permitting Inspection: | Setbacks Confirmed | YES | NO |
|-----------------------|--------------------------------|--------------------|-----|----|

Read & Initial all that apply:

_____ Permit will expire 6 months from the date of issue if work has not begun for most permits. If work isn't complete one year after the permit issue date, an extension must be applied for. Fence and sign work must be completed within 6 months.

_____ **After foundation forms are set up, and before concrete is placed, the Zoning Administrator must inspect the site for setback compliance. Make arrangements for the inspection time 24 hours in advance.**

_____ The applicant agrees to comply with the conditions of this permit and understands the issuance of the permit creates no legal liability, expressed or implied on the Village Agent/Inspector, Department or Municipality. Furthermore, in the absence of a survey, the applicant certifies the location of property lines as accurate.

_____ The undersigned applies for a permit to do work herein described in this application. The undersigned agrees all work will be done in accordance with the Lake Nebagamon Zoning Ordinance, Shoreland Zoning Ordinance, Subdivision Control Ordinance, Floodplain Ordinance and within the parameters of all Wisconsin State laws applicable to said premises.

_____ It is expressly understood by the project owner(s) and/or contractor(s), upon issuance of a permit, the Zoning Administrator, at times joined by the Zoning Chair, shall be allowed to inspect, at reasonable times, any permitted work/use until the project is deemed complete. Failure to allow access to the premises for such inspection shall result in revocation of the permit. Electronic notice will be provided at least 24 hours before such inspection.

_____ All changes to permitted work/use must be submitted in writing to the Zoning Administrator and approved before implementation.

_____ It is the property owner's and/or contractor's responsibility to ensure conditions of all recorded easements are met. These may include, but are not limited to, sewer systems, power lines, gas lines, telephone cables, cable television, pipelines, roads and private access.

_____ Diggers Hotline will be called before starting any earthwork on the property.

_____ Any projects disturbing the soil must implement erosion control measures until such time as the new vegetation is established.

_____ All habitable structures need to be inspected, at the appropriate phases of construction, by the appointed Village Building Inspector, Rob Leitha. 218-393-6482

I have read and agree to the terms of this application, and certify the information provided is true and accurate.
